1   Generate PIN

2   Successful Login

Note:

➢ After successful login, the user has to generate a 4 – digit PIN on their mobile to access the application.

➢ Only digits are allowed (0 to 9).

➢ Both PINs entered should be the same for a successful PIN creation.

➢ The generated PIN will be stored in the local mobile database, and it can be used to access the LokOS application on that mobile only.
